

# BVC

A Quirepace Ltd Company

## Industrial & Commercial Vacuum Cleaners

*Centurion T180 with large filter*

# The Centurion Range

High power, ease of use and portability are the key design parameters of our flagship Centurion range of heavy duty industrial vacuums which are capable of cleaning some of the most difficult industrial waste very rapidly, yet are versatile and extremely manoeuvrable

*Easy bin emptying*

- Motors range from 4kw to 15kw
- Large easy clean filter system
- Powerful continuous suction
- Large range of robust accessories

## Power Reliability & Filtration

- Power and reliability comes from 3 phase induction motors and well-proven BVC exhausters, which provide continuous high suction power
- Very easy to empty and move around making Centurion simple and efficient for use by unskilled operatives
- Excellent filtration as standard due to use of 'clear flow' filters. HEPA filtration, Optional
- Centurion units can also be connected to interceptors to massively increase collection volumes
- Powerful enough to be connected to a fixed pipe system which is ideal where cleaning is needed in otherwise inaccessible areas or when various locations need cleaning at the same time

*Large clear flow filter*

# Company Profile

BVC has been manufacturing Industrial and Commercial Vacuum Cleaners and Floor Maintenance equipment for over 100 years. Indeed the 'BVC' brand was founded by the inventor of the vacuum cleaner, H. Cecil Booth, back in 1901. We have many thousands of satisfied customers throughout both the UK and world-wide who have come to know the BVC brand as synonymous with High Performance, Quality and Value for Money

## Service

A national after sales facility is provided by field based service engineers who can provide a fast response breakdown service to ensure your investment is soon back in working order should it ever breakdown

We can also arrange preventative maintenance contracts at agreed intervals to ensure your machines are working at peak performance

BVC reserves the right to change design without notice

### Note

- 1 Filtration efficiency 99.5% @ 5 micron
- 2 Filtration efficiency 95% @ 5 micron
- 3 Filtration efficiency 99.997% @ 0.6 micron
- 4 Meets BS EN 60335/2/69
- 5 A wide range of interceptors are also available
- 6 1380 Basic, 1565 Clearflow, 1665 Clearflow & Hepa
